

Artificial Intelligence and Cybersecurity Resource Links

- [Coursera](#): Coursera offers over 1,500 AI courses, many of which are free. Examples include AI for everyone, IBM applied AI, and machine learning. You can gain a solid foundation in AI for free.
- [edX](#): This massive open online course (MOOC) provider offers more than 20 online courses in artificial intelligence. Most of these courses are free. However, professional certificate programs cost between \$200-\$550.
- [Udemy](#): Another MOOC provider, Udemy offers over 400 courses related to artificial intelligence. Courses cover topics like AI for business, machine learning with Python, and AI for non-technical. Some courses are free, although many cost about \$140 or less.
- [Google](#): Google offers more than 20 resources to help you learn AI. These resources include guides, podcasts, videos, courses, and interactive content. Available courses include an introduction to machine learning problem framing and a machine learning crash course with TensorFlow APIs. Many of these resources are free.
- [Harvard Business School](#): Harvard offers an online AI course that features virtual networking, discussion groups, and self-paced work. The course costs \$6,250 (not free) and covers data science, predictive modeling, and machine learning.
- [Coding bootcamps](#) are intensive courses that prepare you for an entry-level career in a certain discipline. Coding bootcamps may focus on areas like [software development](#), [cybersecurity](#), or [data science](#). The [bootcamp experience](#) may feature full-time, part-time, or [self-paced learning](#) options and happen online or in person. (some are free)
